

SATISH KUMAR KOVURU

Lead SDET | QA Automation Architect | AI-Augmented Testing

Georgetown, TX 78628 | satishkumar92@yahoo.com | 815-517-6108 | LinkedIn: linkedin.com/in/satishkovuru

CAREER SUMMARY

- Lead SDET / QA Automation Architect with 10+ years designing scalable test automation frameworks and strategies across financial services and telecom applications — UI, API, and end-to-end.
- Proven technical leader integrating automated testing into CI/CD pipelines, driving code reviews and test planning across the SDLC with engineers and product owners.
- Deep expertise across functional, regression, API, performance, and security testing — cut manual testing **30–60%**, reduced regression time **40%**, and improved defect detection **25–30%**.
- Hands-on with AI-assisted test automation (MCP, GitHub Copilot, Cursor AI), Java/Python/C#/TypeScript frameworks, SQL validation, Git, DevOps practices, and Agile delivery at scale.

TECHNICAL SKILLS

UI Automation	Selenium, Playwright, SpecFlow, Appium
Languages	Java, Python, C#, TypeScript, SQL, Shell
API Testing	Postman, Newman, Rest Assured, GraphQL, SOAP UI, Ready API, CA Lisa/DevTest
Frameworks	TestNG, JUnit, NUnit, Cucumber, BDD/TDD, Robot Framework
CI/CD & Version Control	Jenkins, GitHub Actions, Octopus, Git, GitHub
Cloud & Platforms	AWS (EC2, S3, CloudFormation), Oracle Cloud CPQ, Salesforce
Non-Functional Testing	Performance testing, load testing (JMeter), security/release-gate testing, integration testing
AI / GenAI	GitHub Copilot, Cursor AI, MCP, Agentic AI, LLM-assisted test generation, Claude Code
Databases	SQL, Oracle, PostgreSQL, RDS, Aurora
Mobile	Appium (UiAutomator2), Sauce Labs, LambdaTest
Tools	JIRA, Confluence, QTest, Zephyr, Report Portal, Splunk, Kibana, Grafana, Dynatrace

PROFESSIONAL EXPERIENCE

Lead Software Developer in Test — LPL Financial, Austin, TX	Jan 2024 – Present
• Define and execute test strategy and test plans for advisor trading and wealth-management applications — functional, regression, API, security, and release-gate testing. • Achieve zero critical post-production defects on owned releases through rigorous release-gate and regression testing. • Designed and maintain a Selenium + TestNG + Java framework, achieving a 60% reduction in manual execution effort and a 40% increase in regression coverage. • Drive migration from Selenium/Java to Playwright (TypeScript) across 500+ automated tests for faster, more stable end-to-end automation. • Automate GraphQL and REST APIs using Postman and Rest Assured — covering queries, schema validation, authentication, and routing. • Lead QA for legacy-to-modern migration from monolithic REST to GraphQL, including side-by-side data validation and cutover. • Built AI-augmented QA workflows using MCP and Cursor AI, achieving 30% faster test case design, locator discovery, and triage. • Perform Appium (UiAutomator2) mobile automation for advisor Android applications. • Manage test traceability in QTest and Zephyr; validate data with SQL across legacy and modern data sources. • Provision AWS test environments (EC2, S3, VPC) via CloudFormation; strengthen DevOps practices through Octopus and GitHub Actions CI/CD pipelines across the SDLC. • Participate in code reviews and architecture/design discussions to promote testability and quality throughout the development lifecycle. • Mentor a team of 4 QA engineers on Playwright, GraphQL API testing, Selenium/TestNG, and AI-assisted testing.	
Sr. Software Developer in Test — TransUnion, Chicago, IL	Mar 2020 – Dec 2023
• Designed a hybrid automation framework for Web UI, mobile, REST, and SOAP APIs using Serenity BDD, SpecFlow, Rest Assured, and RestSharp, increasing automation coverage by 30%.	

- Led migration from Robot Framework to Playwright across **300+ test cases**, reducing maintenance effort **30%** and improving execution stability.
- Automated API validation with SOAP UI, Ready API, Postman, and Rest Assured; developed ETL tests with Ab Initio Express IT, expanding data validation coverage **20%** and defect detection **30%**.
- Enhanced Salesforce QA by automating lead creation, opportunity management, quote generation, Lightning and Classic workflows, triggers, process builder, and credit bureau integrations.
- Automated Salesforce UI using an in-house framework and PORV tool for Shadow DOM locators; built end-to-end Sales Cloud regression coverage for dashboards and credit product launches.
- Used CA DevTest for service virtualization, SQL for database validation, and Bash scripts for data comparison; mentored a team of **3 QA engineers** through workshops and best practices.

SDET / CPQ Developer — Motorola Solutions Inc., Schaumburg, IL

Nov 2017 – Feb 2020

- Developed a Java Selenium WebDriver data-driven framework with Apache POI, improving coverage and reducing turnaround time **30%**.
- Performed SOAP and REST API testing and Appium mobile testing on Android and radio devices.
- Automated functional, regression, integration, and performance testing for Salesforce Lightning and Classic, Oracle Cloud CPQ, Oracle Commerce Cloud, and ecommerce storefront flows.
- Created and maintained BML code, CPQ product configurations, pricing waterfalls, tiered pricing, constraints, document generation, and Oracle R12 Configurator and COF setups.
- Designed API and integration tests for Salesforce and OCC web services covering payloads, authentication, and error handling.
- Managed CPQ data tables, UI/UX rules, sandbox refreshes, data masking, test data, Agile PLM, ERP, and CRM configurations.
- Conducted load and performance testing for OCC and Salesforce APIs; supported ERP migration, RPA initiatives, Six Sigma QA processes, and cross-functional release activities.

Associate Consultant — Capgemini Financial Services, Chicago, IL

Mar 2017 – Nov 2017

- Developed and executed 1,500+ automated test scripts using Java, Selenium WebDriver, and TestNG, increasing test coverage **35%** and enabling early defect detection across regression suites.
- Automated UI, API, and performance testing using Rest Assured, SOAP UI, Postman, and JMeter, integrated into CI/CD pipelines.
- Implemented Cucumber BDD across regression suites, reducing release cycle time **20–25%**.
- Enhanced data-driven and hybrid automation frameworks with JUnit/TestNG for optimized execution, reporting, and maintainability in Agile delivery.

Software Engineering Analyst — Accenture, India

Oct 2013 – Jul 2015

- Automated 650+ UI and API test cases using Selenium WebDriver, Rest Assured, Java, JUnit, and TestNG, reducing manual testing effort **35%** across sprint-based regression cycles.
- Built TestNG and Jenkins CI pipelines automating **200+ test executions per sprint**; validated backend data using SQL, stored procedures, and optimized queries for REST API test scenarios.
- Designed a Java/Spring MVC test automation tool with structured logging (Log4j), reducing manual QA effort **70%**; tracked defects in JIRA and HP Quality Center.

EDUCATION

MS, Management Information Systems — Northern Illinois University, DeKalb, IL | GPA 3.53

Aug 2015 – Dec 2016

BE, Civil Engineering — Anna University, Chennai, India | GPA 3.50

Aug 2009 – May 2013
